Dear Hiring Committee,

I am applying for a position with Dallas Medical Center. I graduated with my ADN from Colorado Mountain College in May and am concurrently enrolled in the RN-BSN program with an expected completion date of May 2020.

Throughout my clinical rotations, I had the opportunity to work in many settings, including emergency, critical care, perioperative, medical-surgical, labor and delivery, and psychiatric care. These different experiences have prepared me for the many challenges I will face as nursing professional. I was fortunate enough to have spent many occasions learning in Level 1 Trauma facilities such as Denver Health. I spent over 120 hours learning detailed assessments and procedures in my capstone clinical, in which I fortunate to float to neuro, surgical, orthopedic, medical, and rehab floors. I am honest, dependable, and very- detailed oriented and I strive to provide safe, high quality patient centered care. When combined with the knowledge I gained in nursing school, I firmly believe I am prepared to become a high achieving member of your healthcare team.

My previous work experience includes working for St. Anthony Summit Medical Center as the unit coordinator. Through this experience I have gained communication skills working alongside multiple members of the interdisciplinary team including: physicians, surgeons, physical therapist, social workers, case management, and nurses. I have also been fortunate enough to provide high-quality in-home healthcare to senior citizens. My tasks include assisting the patient with ADL's, providing the family with education, as well as coordinating referrals when needed.

I would be ecstatic to begin my professional nursing career with such a well-respected organization. I look forward to hearing from you and hope to set up an interview in the future.

Sincerely,

Paxten Volbecht
