- ◆ Planning care for patients in collaboration with physicians and other healthcare providers.

**Work UT Southwestern Medical Center**

Registered Nurse - Surgical Services (07/2018 to Present)

Perform patient assessments and collaborate with other healthcare team members to plan care. Provide safe, direct patient care for populations ranging from adolescence to geriatric. Provide appropriate and timely education to patients and families, prioritize patient interventions, modify any if necessary, and document all interventions accurately and timely. Distribute medications to be used intraoperatively.

Patient Care Technician - Rehab/Neuro-Stroke (06/2016 - 06/2018)

My duties included taking and documenting vital signs, acquiring blood glucose readings, performing bladder scans and intermittent catheterization, and helping patients with their ADL's. I assisted in setting up rooms for admission and transferring patients out of unit at discharge. I maintained a clean work environment by making sure patient rooms are safe and free of clutter. I also reported any changes in a patient's status to the primary nurse. Any other duties as assigned.

**Parkland Hospital**

Patient Care Assistant I - Surgical ICU (05/2014 - 04/2015)

My duties included emptying indwelling urinary catheter bags or other drains, acquiring blood glucose reading using a glucometer, stocking supplies, emptying soiled linen bags, and stocking WOW's. Helped with repositioning, bathing, feeding and any other ADL's. Gathered equipment and prepared rooms for admission. Assisted in transferring patients to radiology or other units. Any other duties as assigned.

**Red Oak Health & Rehab**

Certified Nurse Aide (05/2013 - 12/2013)

Worked with patients who had Alzheimer's in a long-term care facility and assisted residents with ADL's, transfers, and companionship. Responsible for daily documenting and maintaining patient safety. Any other duties as assigned.
