Crescent Medical Center Lancaster  
2600 W. Pleasant Run Rd.  
Lancaster, TX 75146

Dear Nurse Recruiter,

I am a newly licensed RN, highly interested in working for Crescent Medical Center Lancaster. I graduated from the post-baccalaureate nursing program at Arizona State University in December 2018 with a BSN. I am a newly licensed RN through the Texas BON and will soon be relocating permanently to the Dallas area. My clinical rotation experiences include Long-Term care and inpatient settings including Medical-Surgical, Psychiatric, Pediatrics, Obstetrics, Adult ICU, and a preceptorship in Telemetry. I enjoy a fast-paced learning environment that will feed my inquisitive nature.

I have a relevant academic background, including a previous bachelor's degree in Speech, Language, and Hearing Sciences from the University of Arizona, in addition to prior leadership and work experience in the medical field. Throughout my undergraduate degree, I took advantage of opportunities to get involved in clinical experiences that cultivated my curiosity to learn more about the human body and pursue nursing. I gained clinical experience in the Grunewald-Blitz Clinic for Communication Disorders in Children as well as at a preschool for children in need of speech therapy. After graduation, I worked as a medical scribe in both the Pediatric and Adult Emergency Department as well as a Primary Care setting, solidifying my desire to become a nurse. During my time as a scribe, I gained experience with electronic medical records, deepened my knowledge of the process with patients at point of care, and partnered with many different providers. Through scribing and clinical experiences, I have leveraged my detail-oriented and observant nature to accurately assess, critically think, and use safe judgement.

I feel that Crescent Medical Center provides what I am looking for in an employer with a mission that aligns with my view of patient care – to improve patient's lives through compassionate care. I am confident that my empathy, passion for nursing, and extensive academic and clinical background has provided me the foundation that is required to be a successful RN.

Thank you very much for your consideration.

Sincerely,

Sheridan Pearson
