(817)609-0678

A passionate, knowledgeable Sleep Tech seeking to combine excellent patient care and clinical skills gained at VA Hospital in Dallas. Confident in explaining clinic policies and procedures and preparing a comfortable environment for the patient.

## Education

### Diploma in Polysomnographic Technology

6/2019

Concorde Career College, Grand Prairie, TX

Successfully completed clinical hours at VA Hospital - Dallas

## Skills

- Measures electrical activity of patient brain waves as well as other physiological variables, using Polysomnographic technology, to aid physician in diagnosis treatment of sleep disorders
- Applies surface electrodes to patients head, using adhesive paste or tape, to obtain electroencephalogram EEG measurement plus applies other combinations of sensors & electrodes to patient to obtain measurements such as the electromyogram EMG, electrooculogram EOG, electrocardiogram EKG , air flow, respiratory effort, and plus oxygen saturation, as requested by a physician following established procedures
- Operates closed circuit television camera to observe patient during test to record patients sleep activities
- Operates Polysomnographic equipment to record electrical activity of brain waves as well as other physiological variables records notes on a graph to eliminate from consideration physiological measurements caused by such activities as patient opening eyes, turning head, or turning body
- Able to decipher and study polysomnogram in order to recognize arrhythmias as well as abnormal respiratory patterns. Knows when to call physician or other emergency personnel if needed
- Measures durations of brain waves recorded on polysomnograms, using millimeter ruler
- Studies characteristics of completed polysomnogram tracings summarizes data showing stages of sleep, abnormal breathing events, periodic leg movements, arrhythmias, and also other information, applying knowledge of polysomnograph testing principles
- Enters data into computer as well as constructing summary reports that incorporate patient medical history, completed patient questionnaires, previous plus current polysomnogram information, presence type of abnormality, and also other information for analysis by physician or other health professional
- Familiar and accustomed to applying electrodes to patient scalp, using 10/20 conductive paste
- Proficient in Word and Excel
- Crisis Intervention training
- Red Cross Disaster training
